

Issue Report

Site quality report for https://stadium.open.ac.uk/stadia/index.php?s=1 produced on January 17, 2025.

Overall Quality		1 pages with quality issues
Errors		1 pages with broken links or other errors
Accessibility		1 pages with accessibility problems
Compatibility		0 pages with browser specific issues
Search		1 pages with search engine issues
Standards		1 pages have W3C standards issues
Usability		1 pages with usability issues
Totals		30 URLs checked

Errors

This section shows site quality issues, including broken links and server mis-configurations.

Priority 1

2 issues on 1 pages

- This link is broken. The target anchor does not exist or is commented out.

The anchor after the # symbol points to a non-existent `id` on the target page. If the anchor link targets the same page nothing will happen when it's clicked. If the anchor link targets another page, then the top of the target page will be displayed instead of the intended location. In most cases the destination anchor has been removed accidentally and should be reinstated.

Broken Link

`id=int-content` <https://stadium.open.ac.uk/stadia/index.php?s=1> line 341

- This link is broken. The url scheme is unrecognized.

The URL scheme should be `http:` `https:` `file:` `mailto:` `data:` or `javascript:`

Broken Link

Link: <itpc://stadium.open.ac.uk/berrill/rss2.xml>
<https://stadium.open.ac.uk/stadia/index.php?s=1> line 545

Informative

These messages are for information only and do not indicate errors or conformance problems.

- The Check Page command does not check links or page weight.

To checks links or page weight on a single page use the Check Page and Links command.

Blocked Links

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 1

Accessibility

This section shows accessibility issues, indicating problems for older users, people with disabilities or accessibility needs. Automated testing cannot detect all accessibility issues, so should be used alongside human testing.

Level A

10 issues on 1 pages

- **area** elements must have an accessible name.
Blind users can't see pictures, so each **area** should have an **alt** attribute describing the link. Do not use **alt** text containing only spaces since that's voiced as an unlabeled link.
[WCAG 2.2 A F65 Section 508 \(2017\) A F65](#)
<https://stadium.open.ac.uk/stadia/index.php?s=1> line 456
- Decorative and spacer images must have a null **alt** attribute.
Images used for decoration only should have **alt=""** or **role=presentation** so they can be ignored by screen readers.
 - JAWS : Reads out redundant alt text.
 - NVDA : Reads out redundant alt text.
 - VoiceOver : Reads out redundant alt text.[WCAG 2.2 A F38 Section 508 \(2017\) A F38](#)
<https://stadium.open.ac.uk/stadia/index.php?s=1> line 472 480 482
- Elements with **role=tablist** must contain or own an element with **role=tab** and must not contain elements with other roles.
[HTML5 ARIA 1.2 WCAG 2.2 A 1.3.1 Section 508 \(2017\) A 1.3.1](#)
Owned roles: **list** <https://stadium.open.ac.uk/stadia/index.php?s=1> line 556
- Identify row and column headers in data tables using **th** elements, and mark layout tables with **role=presentation** .
Data tables allow screen reader users to understand column and row relationships. Layout tables read cells as a series of unrelated paragraphs with no tabular structure. Without **th** or **role** , screen readers apply heuristics to decide whether a table is a layout table or data table. These heuristics vary greatly between screen readers, and are affected by browser being used, window size, and font size (so the outcome is very unpredictable without **th** or **role**). If a data table has headers marked up using **td** , then change these to **th** . If a data table has no headers, add **th** elements describing

each row and/or column. If the table is only used for layout add `role=presentation` to the `table` element.

- JAWS Reading: Treats tables without `th` and `role` as layout tables if the table contains cells above or below certain pixel sizes. This measurement is affected by browser window size, browser font size, and the browser used.
- NVDA Reading: Applies a layout table heuristic to tables without `th` and `role` which varies depending on the browser used and on the window size in some circumstances.
- VoiceOver Reading: Uses a sophisticated heuristic on tables without `th` and `role`, which is similar (but not identical) to the heuristic used by NVDA with Firefox.

[WCAG 2.2 A F91 Section 508 \(2017\) A F91](#)

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 451 464 474 484

- `img` elements must have an accessible name.

Add an `alt` attribute describing the image, which screen readers voice instead of the image. Spacer images and purely decorative images should use `alt=""` without any global ARIA attributes. Do not use `alt` text containing only spaces since that's voiced as an unlabeled image.

- NVDA 2023.3 Chrome 120 Windows 10 Reading: Image ignored.
- NVDA 2023.3 FF 115 Windows 10 Reading: Image ignored.
- NVDA 2023.3 Edge 120 Windows 10 Reading: Image ignored.
- JAWS 2023.2311.34 Chrome 120 Windows 10 Reading: Image ignored.
- JAWS 2023.2311.34 FF 115 Windows 10 Reading: Image ignored.
- JAWS 2023.2311.34 Edge 120 Windows 10 Reading: Image ignored.
- VoiceOver macOS 13.6 Safari 16.6 macOS 13.6.0 Reading: Image filename read out.
- VoiceOver iOS 16.6 Safari iOS 16.6 iOS 16.6.1 Touch: Image filename read out, along with OCR text from image.

[WCAG 2.2 A F65 Section 508 \(2017\) A F65](#)

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 472 475 480 482 ...

- Indicating links using only a text color change does not work for color-blind users.

Remove the `text-decoration:none` property from your link styles, or add other style attributes in addition to color changes to make links visible to people without color vision. If the non-color cue only happens when the mouse hovers over the link or when the link receives focus, it is still a failure.

[WCAG 2.2 A F73 Section 508 \(2017\) A F73](#)

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 466 467 469 488 ...

● Links must have an accessible name.

- Add text between the a element start and end tags
- Add an aria-label attribute
- Add an aria-labelledby attribute
- Add an img alt attribute labeling the link if it contains an img element

[WCAG 2.2 A F89 Section 508 \(2017\) A F89](#)

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 486 492 498 504 509 ...

● The visual label must appear in the accessible name of links and controls.

People who use speech control rely on being able to select elements using the visual label displayed on screen. If this isn't part of the accessible name, they can't select elements by name.

[WCAG 2.2 A F96 Section 508 \(2017\) A F96](#)

Visual label: "Ocr" not in "Shopping cart - Your module choices"

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 367

● This page uses nested tables, which do not make sense when read in a screen reader.

Add `role= 'presentation'` if the inner table is a layout table, otherwise modify the inner table to present the same data without nesting tables.

[WCAG 2.2 A F49 Section 508 \(2017\) A F49](#)

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 474

● This skip link is broken. The target anchor does not exist or is commented out.

The anchor after the # symbol points to a non-existent ID on this page, so nothing happens when it's clicked. In most cases the destination ID has been removed accidentally and should be reinstated.

[WCAG 2.2 A 2.4.1 Section 508 \(2017\) A 2.4.1](#)

<https://stadium.open.ac.uk/stadia/index.php?s=1> line 341

Level AA

1 issues on 1 pages

- The CSS outline or border style on this element makes it difficult or impossible to see the link focus outline.

Do not remove the default outline style, and change any border styles to avoid obscuring the focus outline around focusable elements. See :focus-visible for more information.

- Chrome (obscures the focus indicator on links, buttons, dropdowns and range controls)
- Firefox (obscures the focus indicator on links)

[WCAG 2.2 AA F78 Section 508 \(2017\) AA F78](#)

`outline-style:none` or `outline-width:0`

Usability

This section shows general usability issues, indicating navigation problems for all users.

Priority 2

1 issues on 1 pages

- Omitting `img width` or `height` attributes makes the page layout jump about as images load.

This makes the page very hard to read or click while it's loading. Fix by adding width and height attributes to the `img` tag matching the image dimensions. In responsive layouts, specifying `width` and `height` prevents layout jumping because the browser can pre-calculate the final image size when CSS like this is used: `img { max-width: 100%; height: auto }`
